# MySQL Queries

1. Refer to the schema. Write a query to display the hotel name along with the type. Display the details in the below format.
   Give an alias name as `hotel_info`. Sort the result in descending order.

SELECT CONCAT('hotel_info ', Hotel_name, ' is a ', Hotel_type, ' hotel') AS output

FROM hotel_info ORDER BY hotel_name DESC;

2. Write a query to display car id, car name and owner id of all the cars whose car type is 'Hatchback' or 'SUV'. Sort the result based on car id.

SELECT car_id, car_name, owner_id FROM cars WHERE car_type IN ["Hatchback", "SUV"] ORDER BY car_id;
